

QUALITY POLICY

02/04/2018

FABELEEC, S.L. is an organisation dedicated to the integral assembly of circuits and electrical and electronic equipment.

The main objective of our organisation is to comply with the applicable requirements, meeting the needs of our customers, always acting within the current legislation, and always trying to achieve continuous improvement in our processes.

The quality policy is appropriate to the purpose and context of the organisation supporting its strategic direction and provides a framework for setting objectives, which are reviewed annually and are installed at all levels of the organisation.

The technological improvement and innovation of our facilities and production capabilities is another important point in the growth and competitiveness of our organisation. A commitment to technological growth that places us at the forefront of our sector.

Specific objectives in training and the continuous evaluation of our operators means that we have a team of people who are fully qualified to carry out their activities.

The detection of opportunities for improvement in our Quality Management System, through periodic reviews of the same, guarantee its permanent adaptation and suitability to the demands of an increasingly competitive market and a constantly evolving environment.

In summary, the Quality Management System implemented in FABELEEC, S.L., is based on the following principles of action:

- Compliance with service requirements and specifications.
- Compliance with safety and regulatory standards applicable to the service.
- Compliance with improvement plans and planned objectives.
- Continuous improvement of our processes and management systems.
- Providing the necessary resources for the continuous improvement of the system.
